BIOE 476: Tissue Engineering, Fall 2017

Homework 5- due Thursday, November 9th (One Copy Per Group)

Semester Project Draft Summary

Each group should provide a 1-page draft summary of their project idea. You should outline the main components of your proposal, and answer the following questions:

- What are the current approaches or methods used in your topic area, and what are the limitations of these approaches?

- How do you propose to address these limitations?

- What is the most novel aspect of your proposed experiment or method?
