1. (5 points) Suppose that $T(n)$ is the running time of Chop on an input array of length $n$. Give a recursive definition of $T(n)$. Assume that dividing the list in half takes $O(n)$ time.
2. (4 points) What is the height of the recursion tree for $T(n)$, assuming $n$ is a power of 2 ?
3. (3 points) What is the amount of work (aka sum of the values in the nodes) at level $k$ of this tree?
4. (3 points) How many leaves are in the recursion tree for $T(n)$ ? (Simplify your answer.)
