

List Implementation #2: _____

```

List.h
1 #pragma once
2
3 template <typename T>
4 class List {
5     public:
6     /* ... */
28     private:
29
30
31
32 };
    
```

Implementation Details and Analysis:

What is the running time of `insertFront()`?

C	S	2	2	5
[0]	[1]	[2]	[3]	[4]

→ What is our resize strategy?

...total copies across all resizes: _____

...total number of insert operations: _____

...average (amortized) cost of copies per insert: _____

Array Resize Strategy #2:

...total copies across all resizes: _____

...total number of insert operations: _____

...average (amortized) cost of copies per insert: _____

Running Time:

	Singly Linked List	Array
Insert/Remove at front		
Insert after a given element		
Remove after a given element		
Insert at arbitrary location		
Remove at arbitrary location		

A List implementation in `std`

- `std::vector` implements a list with dynamic growth
- `#include <vector>` to use it!
- Documentation widely available, including on CBTF exams

Stack ADT

Function Name	Purpose

Queue ADT

Function Name	Purpose

Stack and Queue Implementations

Stack.h	
1	#pragma once
2	
3	#include <vector>
4	
5	template <typename T>
6	class Stack {
7	public:
8	void push(T & t);
9	T & pop();
10	bool isEmpty();
11	
12	private:
13	std::vector<T> list_;
14	};
15	
16	#include "Stack.hpp"

Stack.hpp	
3	template <typename T>
4	void Stack<T>::push(const T & t) {
5	list_.push_back(t);
6	}
7	
8	template <typename T>
9	const T & Stack<T>::pop() {
10	const T & data = list_.back();
11	list_.pop_back();
12	return data;
13	}

Three designs for data storage in data structures:

1. T & data
2. T * data
3. T data

Implication of Design

	Storage by Reference	Storage by Pointer	Storage by Value
Lifecycle management of data?			
Possible to insert NULL?			
External data manipulation?			
Speed			

CS 225 – Things To Be Doing:

1. Programming Exam A starts Sept. 26 (*next Thursday*)
2. MP2 due Sept. 23 (*next Monday*); MP3 released Tuesday
3. lab_inheritance due Sunday.
4. Daily POTDs
