## OUR SERVICES

### SYSTEM PROTECTION

SubGrid's professionals have the expertise to study, coordinate, configure and protect client infrastructure. We design **Protection & Control** schemes and develop **Relay Settings** to allow for safe and reliable power transmission and distribution at voltages ranging from 500kV to 4kV.

### PROJECT DEVELOPMENT

SubGrid's focus on **proper planning** in the development stage of a project facilitates a well-defined scope. Our experts work to ensure a proper balance between producing **high quality** deliverables, adhering to **schedule** and performing within **budget**. Projects include new substations, capacity improvements, aging infrastructure upgrades and **Solar interconnections**.

### OWNER'S ENGINEER

Our team works on behalf of the owner developing studies, requests for proposals, **standards** and design criteria. We oversee the work of other consultants, perform **quality reviews** and provide support during construction.

## ABOUT US

**SubGrid Solutions, LLC** is an engineering consulting firm bringing customer-focused, high quality expertise to the power delivery market. SubGrid was founded to create an exceptional place to work for industry leaders and to develop the next generation by providing sound engineering solutions with quality being the cornerstone.
