ME170 Lecture Class Assignment #14
DUE DATE: Friday May 3rd midnight.

3D Spatial Assessment – Final evaluation:

As with the 1st assignment, we are asking you to complete the final evaluation of the online spatial visualization test. It’s essentially the same or similar test as you did at the beginning. This time we would like to see how you have progressed in your spatial visualization skills. Please click on the following link:

https://webhost.engr.illinois.edu/~spatialtest

Before you start, make sure you have 20 mins available to complete the test as there is a speed element to the evaluation. It is a “timed” test so you will need to do as much as you can in the timeframe available. Once logged in, click on the big “Assessment” button….and off you go 😊
