Homework Assignment #3, Abstract and Title

Use the same paper you chose for last week’s assignment. This homework consists of two parts:

1. Analyze the title of the paper, using the criteria presented in the January 20 lecture. Is the paper’s title concise and descriptive? Will it capture a busy reader’s attention and interest? Write a one-paragraph evaluation of the title and how it might be improved.

2. Next, write an appropriate abstract for the paper, following the lessons from the February 10 lecture (MMRC).

If you are having any trouble understanding the physics concepts presented in the paper, see Professor DeMarco. (Don’t wait until Thursday at midnight to start the assignment.)

Due: Friday, February 17, 9:00 p.m. Email copies to phys496@physics.illinois.edu. Assignments submitted after the deadline will be downgraded and will be ineligible for rewrite points.

Total—50 points
